

[Vectren Energy Efficiency Rebates](#) up to \$1550.00 for any residential Vectren customer

EnergyWize LLC is a certified contractor to implement Vectren's new Energy Efficiency Rebate program for residential homes. The program offers instant rebates of up to \$1,550 for attic and wall insulation and air sealing.

The program is offering the incentives to the first 400 homes replying to the program to improve their energy efficiency and reduce energy costs.

Incentives include: \$600 for attic insulation
 \$700 for wall insulation
 \$250 for air sealing

Air Sealing is extremely important in maintaining comfort and lowering your energy costs. Typical homes have air infiltrating in and out of their homes about every 2 to 3 hours, some as often as 1 hour. A lot of heat or cooling is lost in this exchange. The Vectren program assists homeowners with the costs of sealing their attic and walls for air infiltration.

All residential homes in the Vectren's Ohio service areas are qualified for the rebates and services.

EnergyWize was selected as a contractor given that it holds a certification from the Building Performance Institute (BPI) for residential energy efficiency practices and building science.

Contact EnergyWize LLC at 937-470-6825 or at wott@energywizenow.com to request a visit and service.
